

ASSESSMENT CONCLUSION

product: **Spray Solar sun spray 50+**
recipe-No.: **1018266**

The product is harmless with consideration of the general toxicological profile of its components, their chemical structure and the degree of exposition in accordance to the standards of Good Laboratory Practice with special attention to warning reference and application conditions with intended and foreseeable use in sense of European cosmetic regulation EG-No. 1223/2009 in each its valid version.

The evaluation covers

■ the toxicological profil

of the components, the available toxicological/dermatological documentation of raw materials and finished product investigation inclusive microbiological assays, safety data sheets, legal regulations, generally obligatory international evaluations, recommendations of authorities and associations and experiences of marketing.

■ the chemical structure

recipe/finished product specifications, raw material specifications, physical/chemical specifications, so far as necessary.

■ degree of exposition

results from application conditions, as fixed in instruction for customers. In order to protect from any dangers, it is referred to legal and voluntarily warnings as well as other information in so far as they are part of the product presentation

The evaluation of Cosmetic-GMP remains unaffected.

All data and evaluations used in this safety evaluation, were made after the today's present body of knowledge. Each subsequent change of recipe or the change or the occurrence of relevant data of this safety evaluation will lead to invalidity of this evaluation.
